

Sample Timelines for Testing

Sample 1 – Payment Gateway Outage

09:00 AM - Payment transactions failing for multiple customers

09:10 AM - Incident response team activated

09:30 AM - Root cause traced to payment gateway outage

10:00 AM - Temporary workaround deployed

10:30 AM - Payment processing restored

10:45 AM - Monitoring confirms stability

Sample 2 – Login Service Disruption

08:15 AM - Customers reporting login failures

08:25 AM - Support team escalated issue to engineering

08:40 AM - Investigation identified authentication service instability

09:05 AM - Recovery actions initiated

09:30 AM - Login success rates improving

09:50 AM - Service fully restored

10:15 AM - Monitoring confirms normal operations

Sample 3 – E-Commerce Website Slow Performance

01:00 PM - Increased website response times detected

01:10 PM - Customer complaints received regarding slow checkout process

01:25 PM - Engineering team initiated investigation

01:50 PM - High traffic surge identified as contributing factor

02:15 PM - Traffic balancing measures implemented

02:40 PM - Website performance improved

03:00 PM - Systems operating normally

Sample 4 – Mobile Application Outage

06:00 PM - Mobile application unavailable for users

06:10 PM - Incident response team activated

06:25 PM - Root cause analysis initiated

06:50 PM - Service recovery plan implemented

07:20 PM - Application accessibility restored

07:45 PM - User activity returning to normal levels

08:00 PM - Monitoring confirms stability

Sample 5 – Order Processing Delay

11:00 AM - Customers reporting delays in order confirmations

11:15 AM - Operations team notified

11:40 AM - Issue isolated during investigation

12:05 PM - Corrective actions deployed

12:30 PM - Order processing backlog reduced

12:50 PM - All pending orders processed successfully

01:10 PM - System performance verified and stable

Sample 6 – Email Notification Failure

03:00 PM - Automated customer emails not being delivered

03:15 PM - Incident reported by support team

03:40 PM - Investigation identified notification delivery issue

04:00 PM - Recovery actions implemented

04:30 PM - Email delivery restored

04:50 PM - Validation completed successfully

05:00 PM - Incident closed
