SKILLS

Python	Intermediate
Java	Beginner
C++	Beginner
JavaScript	Intermediate

PROJECTS

Clock Track

Clock Track is a Python-based attendance system that automates clock-in/clock-out with timestamps, stores data in MySQL, and enables CSV report generation. It reduces manual errors and improves efficiency in attendance management.

Tripzy

Tripzy is a smart travel companion application that allows users to plan trips, explore destinations, and connect with friends for shared travel experiences. It includes features like itinerary planning, destination suggestions, and collaborative travel management, making trip organization simple and interactive.

Aqua Seepage Detector

Aqua Seepage Detector is a smart monitoring system that uses sensors to detect water leakage in pipelines or structures. It provides real-time alerts, helping to reduce water loss, prevent damage, and improve maintenance efficiency.

EXTRA-CURRICULAR ACTIVITIES

- Served as Secretary of the Ethical Hacking Club, coordinating activities and managing club events.
- Participated in Smart India Hackathon (SIH) as a team leader and was selected in the internal hackathon round.
- Actively participated in college cultural events and dance performances.
- Took part in awareness marathons supporting community causes.
