PROJECTS

Ocean Guardian - Robotic Waste Collection System

- Addressed water pollution caused by floating waste by designing a boat-like robotic waste collection system.
- Reduced reliance on manual cleaning by automating waste detection and collection using integrated hardware and software.
- Improved efficiency and safety of water cleaning through smart navigation and control logic.
- Contributed to environmental sustainability by developing a scalable solution for maintaining cleaner water bodies.

TRAFIS-X - Advanced Social Media Risk Analysis System (Patent Filed)

- Developed a deep learning system to detect fake accounts and social media risks
- Implemented real-time threat detection and automated content moderation
- Enhanced user privacy using anomaly detection and content classification
- Filed a patent for the system improving social media security and reliability
